

HOW TO REFER...

Individuals must be referred by their family doctor or a specialist. Referrals are reviewed by an interdisciplinary committee and prioritized based on date of referral and urgency.

For a copy of our referral form, please contact the centre at (506)-452-5225 or download it from our website at www.rivervalleyhealth.nb.ca/en/programs/sccr/referral_form.pdf

For more information on our services, how to refer, the status of your referral, or your appointment, please contact our team administrative assistant at 506-452-5510.

STAN CASSIDY CENTRE
FOR REHABILITATION

Adult Rehabilitation Services

Centre de réadaptation
STAN CASSIDY
Centre for Rehabilitation

Towards Independence / Vers l'autonomie

ADULT NEUROLOGICAL REHABILITATION SERVICES

OUR VISION...

SCCR offers a variety of specialized assessment and intervention services to clients with complex disabilities from all parts of the province. The programs provide highly specialized inpatient services, day patient services and specialty clinics, in both official languages. The centre offers support to therapists who are providing primary and secondary services via consultation and professional education opportunities. Research and provision of information/services to consumers are also essential components of the tertiary program.

OUR GOAL...

Our goal is to maximize independence and self care for people with neurological disorders. We strive to provide excellence and leadership in patient care, research and teaching.

OUR PHILOSOPHY...

At SCCR, rehabilitation is about working with each individual patient and family to reach their highest level of independence and quality of life.

WHO DO WE TREAT?

Adults from across New Brunswick with:

- Traumatic brain injuries
- Spinal cord injuries
- Complex strokes
- Neuromuscular disorders such as MS and ALS
- A wide range of other acquired or inherited neurological conditions

OUR TEAM INCLUDES:

- Clinical Dietetics
- Neuropsychology
- Nursing
- Occupational Therapy
- Physiotherapy
- Psychology
- Psychiatry
- Recreation Therapy
- Pastoral Care
- Social Work
- Speech Language Pathology

The patient and their family/caregivers are an important part of the team. They participate in goal setting and treatment planning.

WHAT WE OFFER...

Inpatient Services:

This is our core service on the Adult Team and includes 20 inpatient beds available for individuals who require highly specialized (i.e. tertiary) services. Following admission, inpatients receive daily interdisciplinary treatment and are seen regularly by a physician. There is at least one family conference and each patient's progress is reviewed at a weekly meeting.

A detailed treatment plan is established and interventions are directed toward achieving the goals of the client and the team. Plans for discharge begin early and continue throughout the patient's stay.

Transitional Living Suites (TLS):

These accessible and self-contained living spaces on site at SCCR are designed for patients requiring intensive assessment and/or rehabilitation but who do not require intensive nursing care .

Outpatient Services:

We offer some single service outpatient services as well as specialized outpatient clinics, including one for Neuromuscular Disorders, and one for Orthotics.

Therapeutic Park

In the fall of 2010, we will be pleased to open Atlantic Canada's first therapeutic park, a place where patients of all ages can practise their independence skills in the fresh air.

TeleRehabilitation

We strive to use the latest available technologies to provide rehab services at a distance in order to best serve our patients around the province.
