OUR PROCESS

1. OPPORTUNITIES

Needs emerge from care, patients and system priorities

2. DESIGN & TEST

Build research and innovation projects as a solution

3. EVALUATE

Generate and analyze data, and outcomes

4. IMPLEMENT

Integrate successful solutions into care

5. LEARN

Evaluate impact for continuous improvement and to inform next cycle

OUR IMPACT

RESEARCH EXCELLENCE

- Increased research capacity
- More investigator-led research
- Higher research productivity

ECONOMIC GROWTH

- Increased external funding
- Industry and innovation partnerships
- Commercialization opportunities
- Talent attraction and retention

HEALTH SYSTEM IMPROVEMENT

- Improved patient outcomes
- Evidence-informed decision making
- Innovative models of care

PEOPLE & COMMUNITIES

- Better health for individuals and communities
- Improved patient and community engagement
- Stronger health care workforce
